

ABSTRACT OF THE DISCLOSURE

A gas insulated switchgear capable of performing maintenance and inspection of a breaker without shutting down a bus line. A gas insulated switchgear comprises a first
5 a bus line. A gas insulated switchgear comprises a first metallic case 9a containing a breaker and having a bushing for leading a load 6a; and a second metallic case 9b containing a plurality of disconnectors and having a plurality of bushings for leading a bus line 6b, 6c to be
10 connected to the disconnectors, wherein the first metallic case 9a and the second metallic case 9b are connected to each other through a gas partition spacer 7a.
